The Watkins VITAL Care Program is a community-based life skills training transition program for the 22 - 64 age group. This transition program is specifically designed for adults with a history of moderate to severe autism, severe intellectual disabilities, or other challenging conduct issues. The program is intended to service those individuals at the more severe end of the diagnostic profile and may still require 1:1 adult assistance for behaviors, their safety, and the safety of others. In general the individual consumers in this program are non-verbal or limited verbal and may have various levels of communication skills, such as signing, limited vocal/verbal, use of picture communication and/or augmentative communication devices programmed for basic communication needs in varying community settings. The continued intervention of language and communication skills is considered vital to integration in community settings.

ADP Adult Day Program

OPICA provides a comprehensive set of services personalized for adults challenged with memory loss, and for their families. Through a broad range of socially and intellectually engaging cognitive stimulation programs delivered by specially trained staff and volunteers, OPICA creates a structured, yet joyful and nurturing, environment that enables adults in all stages of memory loss to maintain dignity and self-worth. These programs, as well as counseling and support groups, help family members of those with memory loss to find hope, respite and peace of mind.

Program/s

- ADHC Adult Day Health Care
- CBAS Community Based Adult Services

We have been providing a structured ADHC / CBAS program since 2003. Our multi-disciplinary team not only assesses each individual's medical, rehabilitative, and social needs, but also seeks to understand their character, spirit, and family support system. Our unique program offers a wide variety of classes and activities that challenge participants physically, mentally, creatively, and socially. We also offer a Dementia Program for participants who may require a lower level of cognitive and environmental stimuli, appropriate physical activity, and more direct supervision and guidance. We staff only qualified healthcare professionals and strictly abide by guidelines established by the licensing and certification agencies.

We provide Adult Day Health Care/CBAS and Adult Day Program services to disabled adults, frail older adults, and individuals with Alzheimer's disease or a related dementia. We provide intergenerational services with Adult Day Care and Child Care in a shared site. The adults and children participate in daily, meaningful interactions. We have contracts with Regional Center and the Department of Veterans Affairs to serve their consumers as well.
